**TEST COMMENTS:** *The test was planted into moist soil conditions. Plants stand was reduced in rows following the tractor tires. Fortunately, every seed product had similar emergence issues. Mostly good growing conditions here but plants were not overly tall making lodging a non-issue. Pods were well clustered at all nodes with a few 4 bean pods. Very little disease noted. Seed size was above average.*

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
