**TEST COMMENTS:** *Planting was delayed due to April snow and May rains, as well as cool temps. Rainfall here was a bit more normal than at other southern MN locations. August only showed 3 inches of rain and moderately changing temps. Plants at harvest were short than average. Brian stated that the field surrounding the plot had higher yield, but the plot's lower location resulted in larger yield deviation.*

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
