**TEST COMMENTS:** *Planting conditions here were great, but emergence was lacking just a little because of all the crop residue that we planted into. Growing season produced ample amounts of rainfall, which was helpful for this sandy soil. Plants were all short and standing perfectly with little to no disease present. Seed size in this area has been larger than average. Overall, this was a nice location.*

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
