Test Comments: *Planting conditions were very good and emergence also did very well. Plot received some timely moisture during ear set. At harvest, plants were tall and most stood well but some lodging noted. Ears were well pollinated with good kernel depth. Ear shanks were beginning to weaken. Dry grain and sturdy cobs made shelling easy. The area is seeing better than expected yields, folks are pleased.*

Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
