Test Comments: *Plenty of moisture throughout the season led to several periods of saturated soil conditions. Aaron, our plot host, noted his earlier maturity hybrids were yielding better than later maturities this year. Ear shanks remained strong at the time of harvest though the effects of some stalk deterioration were captured by lodging scores. Wet October weather has made grain very slow to dry in the fields.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
