**Test Comments:** *This was a beautiful site. Things began well with ideal planting conditions and nice rainfalls in the weeks to follow. Corn was nice and uniform at the V6 stage. This area received good rainfall all season. Pollination produced some nice girthy ears that had deep kernels. Stalk quality was still excellent at harvest. There was some tar spot noted in this region, but nothing that hurt yield at this location.*

Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
