### TEST COMMENTS:

Soil conditions were wet for most of the planting season. Once planted, the plot received more cold rain; we returned for stand counts in June, poor emergence could be seen. The plants that survived were healthy and standing very well. Ears were large with very good seed depth and pollinated to the tip. Cobs were strong. Tom's soil sample program found that the N lost was extreme and reapplied in some fields. Overall the yields have been very good for the conditions seen this year.
