### TEST COMMENTS:

Conditions were favorable for early planting in this area and most corn fields in Palo Alto county were planted by mid-May. The season started in drought conditions, which held on through the entire growing season. Every drop of rain and dew was precious to the crop. Stands were excellent. However, Tom's farm experienced water deficits every month from planting through July. August rainfall returned and helped fill kernel depth. This site ended 8.9" below 10-yr normal and still produced excellent yields.
