TEST COMMENTS:

Compared to other parts of northern Iowa, the furthest northwestern counties of the state have broken out of drought conditions toward the last part of the growing season. This includes Chris' farm here in Sioux county. Thanks to a consistent pattern of showers that set up after the start of July, several rain events in excess of 1" brought much needed moisture to the area. With high fertility and deep soils, plants were very healthy. Ears filled out nicely with deep kernels and test weights over 57 lbs/bu. Late season rainfall and a lack of freezing temperatures favored later maturities in general.
