HARVESTED - STAND:	Oct 4 38.0 /A

TEST COMMENTS:

What a change from last year! Yields nearly doubled this season versus last. In 2020 this site was abnormally dry, causing corn to suffer and yields to tank. This year, Jeff's farm received near-normal rain events that were spread out well and carried the crop through pollination and beyond into August. As of right now, this site is still in D1 (moderate) drought, however, average rainfall was sufficient to produce excellent stands and great kernel depth.
