### TEST COMMENTS:

The plot was planted in early May and achieved really good stands. Emergence was nice and even at the V5 stage. Rainfall was good for most of the growing season but still ended up 3 inches short of the 10-year average. Plants were short in stature but still produced some nice long girthy ears. Stalk quality was starting to deteriorate, most hybrids had the top blown out of them. There was evidence of some Tar Spot that affected the plot late in the season.
