### TEST COMMENTS:

*This location was planted early in very nice soil conditions. Plot had good emergence and looked very nice and uniform early on. It was cool and damp after planting, turning dry for a stretch, then receiving some moisture at times when plants needed it the most. Lodging that was noted was stalk lodging and was somewhat sporadic. Little foliar disease was present with just a small amount of gray leaf spot. Overall a nice test considering the growing season that we had.*
