### TEST COMMENTS:

*This plot was planted in very nice soil conditions with adequate ground moisture. Shortly after planting the plot received a large rain event and had water standing in a few spots making some of the hybrids struggle a bit with emergence. Following the large April 30th rain, it turned very dry and warm until June 29th. The months of July and August were great growing conditions with good moisture and temperatures. The plot was standing very nice but had smaller ears that developed low on the plant with below average plant height. Little foliar disease was present at this location.*
